

Data Visualization using Tableau

1. Perform Data Visualization using Tableau for a dataset of your choice from the web, for the following tasks.

Note: The dataset should be in a table format. You are not supposed to choose that dataset for which the code for the plots is available. You should be able to infer what a particular chart/plot reveals and explain it.

a. **Generate the following charts:** Line, Area, Bullet Graph, Gantt Chart, Packed Bubble Chart, Combination charts, Tree Map, Scatter, Bar, Pie, Choropleth, Bubble and Doughnut. b. **Generate the following Plots:** Histogram, Word Cloud, Box, Scatter Matrix, Point, Count, Joint, Pie, Violin, Kernel Density Estimate (KDE), LM, Heatmap, Swarm, Pair and Count. c. Create a Dashboard by using any of the five graphs you have generated from 1a and 1b.

b. https://help.tableau.com/current/pro/desktop/en-us/dataview_examples.htm

Moodle Submission Logistics:

- You need to have the following files in a zipped folder with the naming format:
"DVT_<<roll_no>>"
 - (a) Your code files along with graphs as the outcome with proper naming extension
 - (b) Your dataset/s
 - (c) any reference materials you have used.

---THE END---
